

Unicode Charts for STIX Two Math Regular

Version 2.13 b169

David M. Jones (on behalf of STIPub)

Generated April 28, 2021

These charts compare the STIX 2.10 against Unicode 13.0.0.

Legend

- Characters shown in black (e.g., U+0021) are supported directly by the font.
- Characters shown in **red** (e.g., U+01CE) are not directly supported but can be synthesized by a Unicode-aware shaping engine. (These charts were generated with Xe_{La}TeX 0.99996.)
- Grey squares (e.g., U+0380) indicate code points that are not assigned a meaning in Unicode 13.0.
- Otherwise blank squares that contain a code point (e.g., U+0020) indicate characters with no visible representation. These may or may not be zero-width characters; see the Unicode Standard for details.
- Completely blank squares (e.g., U+0181) indicate code points corresponding to characters that STIX 2.10 does not support.
- Black squares (e.g., U+FFFE) indicate noncharacter code points.

Notes

- Not every composite character supported by the STIX fonts is included in these charts; only characters that are assigned a code point by Unicode 13.0 are shown. For example, you will not find “x̣” in these charts since Unicode does not assign a code point to that character. It can, however, be composed from the sequence U+0078 LATIN SMALL LETTER X followed by U+0323 COMBINING DOT BELOW.
- Glyphs are shown at size 20 pt unless otherwise indicated.

OpenType Language Systems and Features

See the OpenType Specification for a description of the following features.

Script	Language	ccmp	dtls	flac	ssty
math	DEFAULT	✓	✓	✓	✓

Character Variants

cv01	U+019B	λ → λ̃	LATIN SMALL LETTER LAMBDA WITH STROKE
cv02	U+0264	ø → ø̣	LATIN SMALL LETTER RAMS HORN
cv03	U+2205	∅ → ∅̅	EMPTY SET
cv04	U+2216	\ → ⁂	SET MINUS

Note: The default shape of the empty set symbol has not been changed to preserve backwards compatibility.

Stylistic Sets

Version 1 of the STIX fonts contained a number of variant forms that are preserved in STIX Two as OpenType Layout stylistic set substitutions. There are a limited number of such features available, so while an effort has been made to group like substitutions together, there is inevitably a ‘grab-bag’ feature (ss20) containing miscellaneous variants. Sets 8 and 9 are included for compatibility with the XITS fonts. The current repertoire may be extended in the future if there is sufficient interest.
